Product Specifications

Colour	White	Voltage	220V/50-60Hz
Power	3000W	Boiler	5 Litres
Heating Range	50-99°C	Screen Size	7 inch (18cm)
Boiler Material	Stainless Steel	Product Size	220 L x 299 W x 433.5mm H

Features

6 Hole Steam Nozzle Design

5 Groups of Temperature Can Be Set

3000W High Power

5L Stainless Steel Boiler

Multiple security protection

Anti-suction Function

7-inch Touch Screen

Magnetic Water Filter Tray Design

Insect Proof Mesh Design

5 Groups of Temperature Can Be Set Intelligent Multi-segment Program Setting

- Easy one press, flexible to meet a variety of beverage making needs.
- Intimate self-cleaning program design.
- Efficiently release condensation, pipeline remain clean as new.

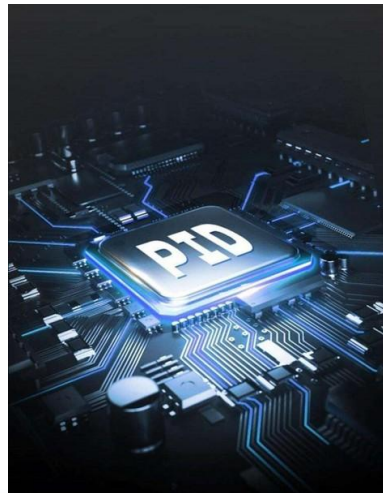

*Quality Forged by Craftmanship
Innovation Seeks Perfection*

6 Hole Silent

Steam Nozzle Design

- More outstanding heating efficiency
- Realize product standardisation
- Low Noise Operation

5 L Stainless Steel Boiler Configuration

Extended Runtime with Enhanced Power

PID Temperature Control System Configuration

Ensures precise and stable temperature control and consistent quality

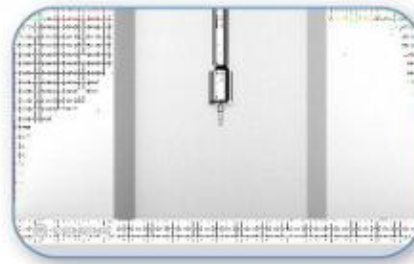

Multiple Protection, thoughtful design

- Water and power shortage protection
- Anti-suction function
- Automatic pressure relief valve

Magnetic Water Filter
Tray

Dispose of wastewater cleaning is more convenient

Anti-suction Structure
Configuration

Prevent liquid back suction when the valve is closed, causing pipeline contamination

Built-in Probe Design

Precise monitoring of real-time dynamic temperature to maintain consistency in product output
